Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 14 and 15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is insufficient antecedent basis for the following limitations in the claims.

Claim 1 recites the limitation "said motor base" in line 8. Claim 4 recites the limitation "said frame" in line 2.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al. (U. S. Pat. No. 5,256,922).

Art Unit: 2834

Regarding claim 1, Tanaka et al. show a surface mountable motor base comprising:

- A base (101, Figure 9);
- A bearing supporter (102) extending from said base for supporting a bearing (110);
- A stator supporter (outer circumferential surface of 102) concentric with said bearing supporter for supporting a stator (105); and
- A terminal (140) for connection to a winding (106) of said stator, said terminal exposed on a bottom of said motor base and extending substantially parallel (left to right, Figure 9) to said base.

Regarding claim 14, it is noted that Tanaka et al. also show said surface mountable motor base being one of a plurality of surface mountable motor bases included in a frame (of an optical disk).

Regarding claim 15, it is noted that Tanaka et al. also show said terminal (142) being flat.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al. in view of Hiroyasu (JP09070162).

Regarding claim 2, Tanaka et al. show all of the limitations of the claimed invention except for a plurality of said motor bases being linked to each other.

Hiroyasu shows a plurality of the motor bases being linked to each other (Figure 1) for the purpose of increasing the production of the motors.

Since Makoto and Hiroyasu are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to link a plurality of said motor bases to each other as taught by Hiroyasu for the purpose discussed above.

Regarding claim 3, it is noted that Hiroyasu also shows a plurality of said motor bases being linked to each other and forming a belt-like shape.

Regarding claim 4, it is noted that Hiroyasu also shows a plurality of said motor bases being linked to the frame (2) in width direction of the belt-like shape, and adjacent said motor bases being separated in longitudinal direction.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2834

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
